What is a Safety Data Sheet (SDS)?

Definition and Purpose

A Safety Data Sheet (SDS), previously known as Material Safety Data Sheet (MSDS), is a document mandated by occupational safety regulations such as OSHA (Occupational Safety and Health Administration) in the United States and similar agencies worldwide. It provides detailed information on a chemical substance or mixture, including its hazards, handling instructions, and safety measures.

The primary purpose of an SDS is to communicate hazards and safety precautions effectively to workers, emergency responders, and consumers. It promotes safe use, storage, transportation, and disposal of chemicals, reducing the risk of accidents and health issues.

Key Sections of an SDS

An SDS typically contains 16 standardized sections, including:

- Identification
- Hazard identification
- Composition/information on ingredients
- First-aid measures
- Fire-fighting measures
- Accidental release measures
- Handling and storage
- Exposure controls/personal protection
- Physical and chemical properties

- Stability and reactivity
- Toxicological information
- Ecological information
- Disposal considerations
- Transport information
- Regulatory information
- Other information

For Harpic bleach, these sections provide vital details about safe usage and emergency response.
